

6. Heart spigot pouring out water next to girl in love
→ cardiovascular physiology during pregnancy = vasodilation (2/2 progesterone) → ↓SVR,
↑HR, ↑CO → systolic ejection murmur
7. Murmur lines coming from heart spigot
→ cardiovascular physiology during pregnancy = vasodilation (2/2 progesterone) → ↓SVR,
↑HR, ↑CO → systolic ejection murmur
8. Plant sensitive to atmospheric conditions
→ pulmonary physiology during pregnancy = central respiratory centers more sensitive to CO₂
(2/2 progesterone) → ↑VT → ↑VE(VTxRR) → chronic respiratory alkalosis (blowing off more CO₂); ↓TLC (3rd tri 2/2 larger uterus)
9. High volume on radio
→ pulmonary physiology during pregnancy = central respiratory centers more sensitive to CO₂
(2/2 progesterone) → ↑VT → ↑VE(VTxRR) → chronic respiratory alkalosis (blowing off more CO₂); ↓TLC (3rd tri 2/2 larger uterus)
10. Music in the air + timer on radio set to 60s.
→ pulmonary physiology during pregnancy = central respiratory centers more sensitive to CO₂
(2/2 progesterone) → ↑VT → ↑VE(VTxRR) → chronic respiratory alkalosis (blowing off more CO₂); ↓TLC (3rd tri 2/2 larger uterus)
11. Boy blowing bubbles through the “OH” wand
→ pulmonary physiology during pregnancy = central respiratory centers more sensitive to CO₂
(2/2 progesterone) → ↑VT → ↑VE(VTxRR) → chronic respiratory alkalosis (blowing off more CO₂); ↓TLC (3rd tri 2/2 larger uterus)
12. Decreased size of third lung plant
→ pulmonary physiology during pregnancy = central respiratory centers more sensitive to CO₂
(2/2 progesterone) → ↑VT → ↑VE(VTxRR) → chronic respiratory alkalosis (blowing off more CO₂); ↓TLC (3rd tri 2/2 larger uterus)
13. Voluminous red balloons
→ hematologic changes during pregnancy = ↑↑ blood volume (2/2 ↑↑ plasma volume +
↑EPO → ↑RBCs) → (dilutional) anemia of pregnancy (hgb<11g/dL); ↑fibrinogen +
↓protein S activity → ↑↑ thrombotic state

14. 'EPO' canister filling up balloons
 - hematologic changes during pregnancy = ↑↑ blood volume (2/2 ↑↑ plasma volume +
 - ↑ EPO → ↑ RBCs) → (dilutional) anemia of pregnancy (hgb < 11g/dL); ↑ fibrinogen +
 - ↓ protein S activity → ↑↑ thrombotic state
15. Deflated "H 11" balloons in water
 - hematologic changes during pregnancy = ↑↑ blood volume (2/2 ↑↑ plasma volume +
 - ↑ EPO → ↑ RBCs) → (dilutional) anemia of pregnancy (hgb < 11g/dL); ↑ fibrinogen +
 - ↓ protein S activity → ↑↑ thrombotic state
16. Forts made of bunched sticks
 - hematologic changes during pregnancy = ↑↑ blood volume (2/2 ↑↑ plasma volume +
 - ↑ EPO → ↑ RBCs) → (dilutional) anemia of pregnancy (hgb < 11g/dL); ↑ fibrinogen +
 - ↓ protein S activity → ↑↑ thrombotic state
17. Kid burying Sgt. S
 - hematologic changes during pregnancy = ↑↑ blood volume (2/2 ↑↑ plasma volume +
 - ↑ EPO → ↑ RBCs) → (dilutional) anemia of pregnancy (hgb < 11g/dL); ↑ fibrinogen +
 - ↓ protein S activity → ↑↑ thrombotic state
18. Kidney plant watering can w/ dilated spout
 - renal physiology during pregnancy = physiologic ureteral dilation (2/2 progesterone +
 - compression of ureters by uterus), ↑ renal blood flow → ↑ GFR → ↓ BUN + ↓ Cr +
 - ↑ glucosuria
19. Uterus pot compressing hose
 - renal physiology during pregnancy = physiologic ureteral dilation (2/2 progesterone +
 - compression of ureters by uterus), ↑ renal blood flow → ↑ GFR → ↓ BUN + ↓ Cr +
 - ↑ glucosuria
20. Filtered water sprinkler spraying red water on kidney plants
 - renal physiology during pregnancy = physiologic ureteral dilation (2/2 progesterone +
 - compression of ureters by uterus), ↑ renal blood flow → ↑ GFR → ↓ BUN + ↓ Cr +
 - ↑ glucosuria
21. Buried burger BUN + Credit card in kidney plant compost pile

renal physiology during pregnancy = physiologic ureteral dilation (2/2
progesterone +

compression of ureters by uterus), $\uparrow$ renal blood flow $\rightarrow$ $\uparrow$ GFR $\rightarrow$ $\downarrow$ BUN + $\downarrow$ Cr +
 $\uparrow$ glucosuria

22. Yellow sugar water spilling out of bird feeder next to kidney plants

$\rightarrow$ renal physiology during pregnancy = physiologic ureteral dilation (2/2
progesterone +

compression of ureters by uterus), $\uparrow$ renal blood flow $\rightarrow$ $\uparrow$ GFR $\rightarrow$ $\downarrow$ BUN + $\downarrow$ Cr
+

$\uparrow$ glucosuria

23. Nauseous kid next to intestine tree

$\rightarrow$ pregnancy effects on the GI system = $\uparrow$ nausea/vomiting, $\uparrow$ acid reflux

24. "GERDen" sprinkler spraying acid next to intestine tree

$\rightarrow$ pregnancy effects on the GI system = $\uparrow$ nausea/vomiting, $\uparrow$ acid reflux

25. Rubber hoe bending

$\rightarrow$ pregnancy effects on the MSK system = joint/ligament relaxation (2/2
progesterone) $\rightarrow$ back
pain

26. Pain lines coming from boy's back

$\rightarrow$ pregnancy effects on the MSK system = joint/ligament relaxation (2/2
progesterone) $\rightarrow$ back
pain

27. Purple play-doh fight between kids

$\rightarrow$ dermatologic changes in pregnancy = hyperpigmentation 2/2 $\uparrow$ MSH $\rightarrow$
melasma, linea
nigra; $\uparrow$ estrogen $\rightarrow$ palmar erythema, spider angiomas

28. Purple play-doh on kid's face

$\rightarrow$ dermatologic changes in pregnancy = hyperpigmentation 2/2 $\uparrow$ MSH $\rightarrow$
melasma, linea
nigra; $\uparrow$ estrogen $\rightarrow$ palmar erythema, spider angiomas

29. Line of mud on kid's shirt

$\rightarrow$ dermatologic changes in pregnancy = hyperpigmentation 2/2 $\uparrow$ MSH $\rightarrow$
melasma, linea
nigra; $\uparrow$ estrogen $\rightarrow$ palmar erythema, spider angiomas

30. Big red spider on kid's hand

dermatologic changes in pregnancy = hyperpigmentation 2/2 $\uparrow$ MSH $\rightarrow$ melasma, linea

nigra; $\uparrow$ estrogen $\rightarrow$ palmar erythema, spider angiomas

31. INSIDE mat + kid who can't get in the gate

$\rightarrow$ pregnancy effects on the endocrine system = $\uparrow$ hPL $\rightarrow$ $\uparrow$ insulin resistance $\rightarrow$ $\uparrow$ glucose for baby; $\uparrow$ estrogen $\rightarrow$ $\uparrow$ TBG $\rightarrow$ $\uparrow$ total T3/T4 (normal free T3/T4), in 1st tri $\rightarrow$ $\uparrow$ T4 (β -hCG sub-unit similar to TSH)

32. Milk crate next to INSIDE mat

$\rightarrow$ pregnancy effects on the endocrine system = $\uparrow$ hPL $\rightarrow$ $\uparrow$ insulin resistance $\rightarrow$ $\uparrow$ glucose for baby; $\uparrow$ estrogen $\rightarrow$ $\uparrow$ TBG $\rightarrow$ $\uparrow$ total T3/T4 (normal free T3/T4), in 1st tri $\rightarrow$ $\uparrow$ T4 (β -hCG sub-unit similar to TSH)

33. Estro-grow next to "The Best Garden" sign

$\rightarrow$ pregnancy effects on the endocrine system = $\uparrow$ hPL $\rightarrow$ $\uparrow$ insulin resistance $\rightarrow$ $\uparrow$ glucose for baby; $\uparrow$ estrogen $\rightarrow$ $\uparrow$ TBG $\rightarrow$ $\uparrow$ total T3/T4 (normal free T3/T4), in 1st tri $\rightarrow$ $\uparrow$ T4 (β -hCG sub-unit similar to TSH)

34. "School starts in T-4:00" sign

$\rightarrow$ pregnancy effects on the endocrine system = $\uparrow$ hPL $\rightarrow$ $\uparrow$ insulin resistance $\rightarrow$ $\uparrow$ glucose for baby; $\uparrow$ estrogen $\rightarrow$ $\uparrow$ TBG $\rightarrow$ $\uparrow$ total T3/T4 (normal free T3/T4), in 1st tri $\rightarrow$ $\uparrow$ T4 (β -hCG sub-unit similar to TSH)

35. Teacher with sunflower shirt pointing up to "4:00"

$\rightarrow$ pregnancy effects on the endocrine system = $\uparrow$ hPL $\rightarrow$ $\uparrow$ insulin resistance $\rightarrow$ $\uparrow$ glucose for baby; $\uparrow$ estrogen $\rightarrow$ $\uparrow$ TBG $\rightarrow$ $\uparrow$ total T3/T4 (normal free T3/T4), in 1st tri $\rightarrow$ $\uparrow$ T4 (β -hCG sub-unit similar to TSH)
